INDEX TO VOLUME 14

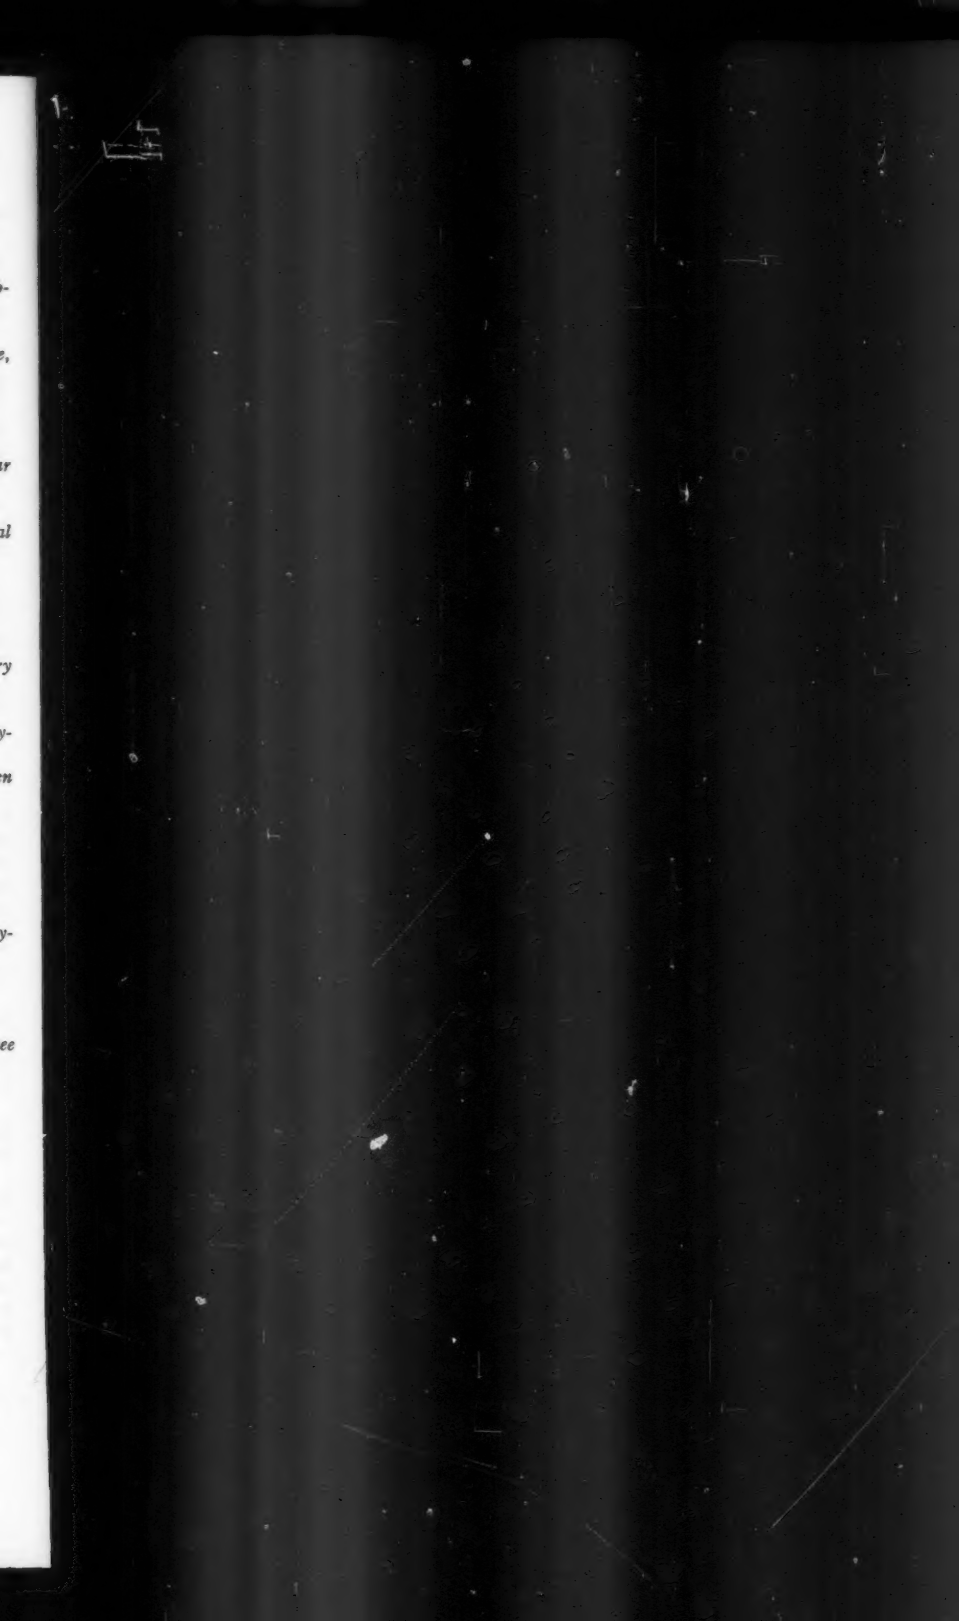
*Starred items are "Shorter Notes"

Adler, R. L. *A note on the entropy of skew product transformations*, 665, 1000.
Akutowicz, E. J. *An interpolation series*, 559.
Andô, Tsuyoshi. *On hyponormal operators*, 290.
Aronson, D. G. *On the correctness of partial differential operators and the von Neumann condition for stability of finite difference operators*, 948.
Artzy, R. *Isotopy and parastrophy of quasigroups*, 429.
Aumann, Georg. *Approximation by step functions*, 477.
Banks, Dallas. *An integral inequality*, 823.
Bateman, P. T., Kohlbecker, E. E. and Tull, J. P. *On a theorem of Erdös and Fuchs in additive number theory*, 278.
Bernstein, D. L. See Coon, G. A.
Berri, M. P. and Sorgenfrey, R. H. *Minimal regular spaces*, 454.
Bierstedt, R. G. and Mills, W. H. *On the bound for a pair of consecutive quartic residues*, 628.
Blackwell, David and Dubins, L. E. *Sharp bounds on the distribution of the Hardy-Littlewood maximal function*, 450.
Blattner, R. J. *Positive definite measures*, 423.
Blum, J. R. and Hanson, D. L. *A note on ergodic transformations*, 718.
Bolker, E. D. *Inverse limits of solvable groups*, 147.
Boyer, B. J. and Holder, L. I. *A generalization of absolute Rieszian summability*, 459.
de Branges, Louis. *A comparison theorem for spaces of entire functions*, 490.
Brauer, Fred. *Bounds for solutions of ordinary differential equations*, 36.
Brodkey, J. S. *A note on finite groups with an abelian Sylow group*, 132.
Brown, Gordon. *On commutators in a simple Lie algebra*, 763.
Brunk, H. D. *On an extension of the concept conditional expectation*, 298.
Buckholtz, J. D. *Concerning an approximation of Copson*, 564.
——— *Column sequences in Hausdorff matrices*, 837.
Bush, G. C. *Note on an embedding theorem of Adyan*, 597.
Carlitz, L. *A sequence of integers related to the Bessell functions*, 1.
——— *Note on a problem of Dickson*, 98.
——— *A note on permutations in an arbitrary field*, 101.
Ceder, J. G. *Compactness and semi-continuous carriers*, 991.
Chao, C.-Y. *On a problem of C. Berge*, 80.
Cohen, H. J. and Supnick, Fred. *Concerning real numbers whose powers have nonintegral differences*, 626.
Cohn, J. H. E. *On the value of determinants*, 581.
Coleman, S. H. *Separability of stochastic processes*, 172.
Coles, W. J. *Some boundary value problems for linear differential systems*, 956.
Coon, G. A. and Bernstein, D. L. *Some general formulas for double Laplace transformations*, 52.
Cross, George. *The relation between two symmetric integrals*, 185.
Crowell, R. H. *Invertible isotopies*, 658.
Curtis, P. C., Jr. *Divergence of approximating polynomials*, 713.
Darst, R. B. *A remark on universal sigma integrability*, 861.
Davis, A. S. *Fixpoint theorem for contractions of a well-chained topological space*, 981.
——— *The uniform continuity of continuous functions on a topological space*, 977.

Dawson, D. F. *On certain sequence to sequence transformations which preserve convergence*, 542.
Deckard, Don and Pearcy, Carl. *On matrices over the ring of continuous complex valued functions on a Stonian space*, 322.
——— *Another class of invertible operators without square roots*, 445.
DeMar, R. F. *Vanishing central differences*, 64.
*Drobot, S. *A note on continued fractions*, 197.
Dubins, L. E. See Blackwell, David.
Edelstein, M., Herzog, F. and Kelly, L. M. *A further theorem of the Sylvester type*, 359.
Edmunds, D. E. *Σ-symmetric locally convex spaces*, 697.
Edwards, C. H., Jr. *Open 3-manifolds which are simply connected at infinity*, 391.
Enochs, Edgar. *Torsion free covering modules*, 884.
Epstein, I. J. *Conditions for a matrix to commute with its integral*, 266.
Erdös, Paul and Stein, Sherman. *Sums of distinct unit fractions*, 126.
Fischer, P. C. *A note on bounded-truth-table reducibility*, 875.
Forelli, Frank. *Invariant subspaces in L^1*, 76.
Fort, M. K., Jr. *A wild sphere which can be pierced at each point by a straight line segment*, 994.
Fraenkel, A. S. *New proof of the generalized Chinese Remainder Theorem*, 790.
Freedman, D. A. *An arcsine law for Markov chains*, 680.
*Giffen, C. H. *Unique factorization for polynomials*, 366.
Gilmer, R. W. *Rings in which the unique primary decomposition theorem holds*, 777.
Glicksberg, I. *Function algebras with closed restrictions*, 158.
——— *Bishop's generalized Stone-Weierstrass theorem for the strict topology*, 329.
Goes, Günther. *Arithmetic means of Fourier-Stieltjes-sine-coefficients*, 10.
Goldberg, Seymour and Thorp, E. O. *On some open questions concerning strictly singular operators*, 334.
Goodman, A. W. *Analytic functions that take values in a convex region*, 60.
Haddock, A. G. *Some theorems related to a theorem of E. Helly*, 636.
Hanson, D. L. See Blum, J. R.
Hartman, Philip. *On the local linearization of differential equations*, 568.
Hayden, T. L. *A convergence problem for continued fractions*, 546.
Heble, M. and Rosenblatt, M. *Idempotent measures on a compact topological semigroup*, 177.
Hedstrom, G. W. *Equi-absolute convergence of eigenfunction expansions*, 483.
Heerema, Nickolas. *Embeddings of a p-adic field and its residue field in their power series rings*, 574.
Hertzig, David. *Rational normal matrices satisfying the incidence equation*, 878.
Herz, C. S. *A class of negative definite functions*, 670.
Herzog, F. See Edelstein, M.
Heuer, G. A. and Lindberg, J. A., Jr. *Algebraic extensions of continuous function algebras*, 337.
Hewitt, Edwin and Zuckerman, H. S. *On a theorem of P. J. Cohen and H. Davenport*, 847.
Hewitt, G. C. *The existence of free unions in classes of abstract algebras*, 417.
*Hirsch, M. W. *A proof of the nonretractibility of a cell onto its boundary*, 364.
Hochschild, G. *Rationally injective modules for algebraic linear groups*, 880.
*Hochstadt, Harry. *A new proof of a stability estimate of Lyapunov*, 525.

——— *Estimates on the stability intervals for Hill's equation*, 930.
Hoechsmann, Klaus. *Algebras split by a given purely inseparable field*, 768.
Holder, L. I. See Boyer, B. J.
Horadam, E. M. *The Euler ϕ function for generalized integers*, 754.
Hudson, A. L. *Example of a nonacyclic continuum semigroup S with zero and $S=ESE$*, 648.
Hyllengren, Anders. *On the quotient of entire functions of lower order less than one*, 465.
Insel, A. J. *A compact topology for a lattice*, 382.
Isbell, J. R. and Thomas, E. S., Jr. *Mazur's theorem on sequentially continuous linear functionals*, 644.
Jakimovski, Amnon. *Tauberian constants for the Abel and Cesàro transformations*, 228.
Jensen, Chr. U. *Remark on a characterization of certain ring class fields by their absolute Galois group*, 738.
Jerrard, R. P. and Rubel, L. A. *On the curvature of the level lines of a harmonic function*, 29.
Jewett, R. I. *A variation on the Stone-Weierstrass theorem*, 690.
Johnson, H. H. *Lie groups associated with pseudo groups*, 84.
Karp, C. R. *A note on the representation of α-complete Boolean algebras*, 705.
Kelly, L. M. See Edelstein, M.
Kemp, R. R. D. *Remarks on systems of nonlinear Volterra equations*, 961.
Kertész, A. *A characterization of the Jacobson radical*, 595.
Kinney, J. R. *Tangential limits of functions of the class S_α*, 68.
Kinukawa, Masakiti. *On the spectral synthesis of bounded functions*, 468.
Kishore, Nand. *The Rayleigh function*, 527.
Kleinecke, David. *Almost-finite, compact and inessential operators*, 863.
Klotz, Tilla. *Some uses of the second conformal structure on strictly convex surfaces*, 793.
Knopp, M. I. *A note on subgroups of the modular group*, 95.
Kohlbecker, E. E. See Bateman, P. T.
Kreith, Kurt. *A new proof of a comparison theorem for elliptic equations*, 33.
——— *Differential operators with a purely continuous spectrum*, 809.
Krishna, J. G. *On relations among some constants of an entire function*, 497.
Kumari, Sulaxana. *On the Behaviour of the Fourier coefficients*, 243.
——— *On the logarithmic means of the successively derived conjugate series of a Fourier series*, 256.
Lakshmikantham, V. *Upper and lower bounds of the norm of solutions of differential systems*, 509.
Lal, S. N. *On the absolute harmonic summability of the factored Fourier series*, 311.
Latimer, J. F. See Tamura, Takayuki.
Leach, E. B. *On a related function theorem*, 687.
Levin, J. J. *The asymptotic behavior of the solution of a Volterra equation*, 534.
Levin, J. J. and Nohel, J. A. *Note on a nonlinear Volterra equation*, 924.
Levine, H. I. *Homotopic curves on surfaces*, 986.
Levine, J. *Imbedding and immersion of real projective spaces*, 801.
Lindberg, J. A., Jr. *On the completion of tractable normed algebras*, 319.
——— See Heuer, G. A.
Lipschutz, Seymour. *Note on a paper by Shepperd on the braid group*, 225.
Lissner, David. *Automorphisms of generalized Witt algebras have fixed points*, 205.
Liu, Teng-sun. *On vanishing algebras*, 162.
Liulevicius, Arunas. *Zeroes of the cohomology of the Steenrod algebra*, 972.

Lloyd, S. P. *On decomposition into stochastically independent components*, 292.
——— *On extreme averaging operators*, 305.
——— *On finitely additive set functions*, 701.
McAndrew, M. H. *On the product of directed graphs*, 600.
McLaughlin, T. G. *A theorem on productive functions*, 444.
McMillan, D. R., Jr. *Homeomorphisms on a solid torus*, 386.
McQuillan, D. L. *Ramification in elliptic modular function fields*, 414.
McWilliams, R. D. *On the w*-sequential closure of a cone*, 191.
MacGregor, T. H. *The radius of convexity for starlike functions of order 1/2*, 71.
——— *The radius of univalence of certain analytic functions*, 514.
——— *The radius of univalence of certain analytic functions*. II, 521.
MacRae, R. E. *On the homological dimension of certain ideals*, 746.
Majindar, K. N. *On incomplete and balanced incomplete block designs*, 223.
Malm, D. G. *A note on exact sequences*, 637.
Maneri, Carl. *Simple* (-1, 1) *rings with an idempotent*, 110.
Marcia, John. *A note on unary algebras*, 792.
Martindale, W. S., 3rd. *Lie isomorphisms of primitive rings*, 909.
Mead, D. G. *A note on the ideal* [*uv*], 607.
Meng, C.-H. *On the numerical range of an operator*, 167.
Merkel, R. B. See Tamura, Takayuki.
Mills, W. H. *Some complete cycles on the n-cube*, 628.
——— See Bierstedt, R. G.
Minc, Henryk. *A note on an inequality of M. Marcus and M. Newman*, 890.
Mordell, L. J. *On a cubic congruence in three variables*. II, 609.
Mostert, P. S. *A fibering theorem for topological semigroups*, 87.
Mount, K. R. *On regular local rings*, 432.
*Myhill, John. *The converse of Moore's Garden-of-Eden theorem*, 685.
Narain, Roop. *The G-functions as unsymmetrical Fourier kernels*. II, 18.
——— *The G-functions as unsymmetrical Fourier kernels*. III, 271.
Nehari, Zeev. *Bounds for the solutions of a class of nonlinear partial differential equations*, 829.
Neuwirth, L. P. *A remark on knot groups with a center*, 378.
Neuwirth, Lee. *On Stallings fibrations*, 380.
Newman, D. J. *Pseudo-uniform convexity in* H^1, 676.
Newman, M. and Smart, J. R. *Note on a subgroup of the modular group*, 102.
Newman, M. F. *On subgroup commutators*, 724.
Newman, Morris, *A note on modular groups*, 124.
Nohel, J. A. See Levin, J. J.
Olubummo, A. *Weakly compact B-algebras*, 905.
Palais, R. S. and Richardson, R. W., Jr. *Uncountably many inequivalent analytic actions of a compact group on* R^n, 374.
Pan, T. K. *Conformal vector fields in compact Riemannian manifolds*, 653.
Parker, E. T. *Remarks on balanced incomplete block designs*, 729.
Passman, D. S. *On groups with enough finite representations*, 782.
Patty, C. W. *A note on the homology of deleted product spaces*, 800.
Pearcy, Carl. See Deckard, Don.
Petryshyn, W. V. *On the generalized overrelaxation method for operation equations*, 917.
Peyser, Gideon. *On the differentiability of solutions of symmetric hyperbolic systems*, 963.
Phillips, R. C. *Interval clans with nondegenerate kernel*, 396.
*Pierce, R. S. *A note on free algebras*, 845.

Pixley, A. F. *Distributivity and permutability of congruence relations in equational classes of algebras*. 105.
Pollard, Harry. *The semi-group property of Poisson transformation and Snow's inversion formula*, 285.
Pommerenke, Ch. *On the hyperbolic capacity and conformal mapping*, 941.
Price, J. J. *On an inequality involving group characters*, 869.
Quintas, L. V. and Supnick, Fred. *Semi-homogeneous functions*, 620.
Rahman, Q. I. *On asymmetric entire functions*, 507.
Raimi, R. A. *Convergence, density and r-density of bounded sequences*, 708.
*Rainwater, John. *Weak convergence of bounded sequences*, 999.
Reichaw-Reichbach, M. *A note on absolute G_δ-spaces*, 806.
Richardson, R. W., Jr. See Palais, R. S.
Rinehart, F. F. and Wilson, J. C. *The relation between continuity and differentiability of functions on algebras*, 134.
Rosen, R. H. *Stellar neighborhoods in polyhedral manifolds*, 401.
Rosenblatt, M. See Heble, M.
Rota, G.-C. *On the maximal ergodic theorem for Abel-limits*, 722.
Rubel, L. A. See Jerrard, R. P.
Rygg, P. T. *On minimal sets of generators of purely inseparable field extensions*, 742.
Sacksteder, Richard. *A remark on equipartitioning and metric transitivity*, 153.
*Sato, Daihachiro. *A simple example of a transcendental entire function that together with all its derivatives assumes algebraic values at all algebraic points*, 996.
Seiden, Esther. *A supplement of Parker's "Remarks on balanced incomplete block designs,"* 731.
Shapiro, V. L. *The circulation of vector fields*, 818.
Shinbrot, Marvin. *Note on a nonlinear eigenvalue problem*, 552.
Shisha, O. See Walsh, J. L.
Smart, J. R. See Newman, M.
Sorgenfrey, R. H. See Berri, M. P.
Spring, R. F. *Lattice isomorphisms of finite non-abelian groups of exponent p*, 407.
*Srinivasan, T. P. and Wang, Ju-kwei. *On the maximality theorem of Wermer*, 997.
Srivastava, K. N. *A class of integral equations involving ultraspherical polynomials as kernel*, 932.
Stanek, Peter. *Concerning a theorem of L. K. Hua and I. Reiner*, 751.
Stein, S. K. *Finite models of identities*, 216.
Stein, Sherman, See Erdös, Paul.
Stolzenberg, Gabriel. *The maximal ideal space of the functions locally in a function algebra*, 342.
Stone, A. H. *A Note on paracompactness and normality of mapping spaces*, 81.
Stone, Charles. *Weak convergence of stochastic processes defined on semi-infinite time intervals*, 694.
Supnick, Fred. See Cohen, H. J.
——— See Quintas, L. V.
Suryanarayana, D. *On odd perfect numbers*. II, 896.
Suyemoto, O. and Waltman, P. *Extension of a theorem of A. Wintner*, 970.
Swan, R. G. *An application of graph theory to algebra*, 367.
Tachikawa, Hiroyuki. *Correction to "A characterization of QF-3 algebras"*, 995.
Tamura, Takayuki, Merkel, R. B. and Latimer, J. F. *The direct product of right singular semigroups and certain groupoids*, 118.


Tanaka, Chuji. *On the boundary values of Blaschke products and their quotients*, 472.
Tang, S. C. *An improvement and generalization of Bellman-Shapiro's theorem on a problem in additive number theory*, 199.
Thomas, E. S., Jr. See Isbell, J. R.
Thompson, A. C. *On certain contraction mappings in a partially ordered vector space*, 438.
Thorp, E. O. See Goldberg, Seymour.
Toda, Hirosi. *Note on cohomology ring of certain spaces*, 89.
Tomonaga, Yasurô. *Certain problems of differentiable imbedding*, 787.
Trampus, Anthony. *A spectral mapping theorem for functions of two commuting linear operators*, 893.
Traylor, D. R. *A note on metrization of Moore spaces*, 804.
Trench, W. F. *On the asymptotic behavior of solutions of second order linear differential equations*, 12.
Tucker, D. H. *A note on the Riesz representation theorem*, 354.
Tull, J. P. See Bateman, P. T.
Ursell, J. H. *On two problems of Mostert and Shields*, 633.
Utumi, Y. *On rings of which any one-sided quotient rings are two-sided*, 141.
Veech, William. *The necessity of Harris' condition for the existence of a stationary measure*, 856.
Viswanatham, B. *A generalisation of Bellman's lemma*, 15.
Walsh, J. L. *A generalization of Fejér's principle concerning the zeros of extremal polynomials*, 44.
Walsh, J. L. and Shisha, O. *The zeros of infrapolynomials with prescribed values at given points*, 839.
Waltman, P. See Suyemoto, L.
Wang, Ju-kwei. See Srinivasan, T. P.
Widder, D. V. *Two convolution transforms which are inverted by convolutions*, 812.
Widom, Harold. *Rapidly increasing kernels*, 501.
Wilf, H. S. *Whittaker's constant for lacunary entire functions*, 238.
——— *Some applications of the inequality of arithmetic and geometric means to polynomial equations*, 263.
Wilson, J. C. See Rinehart, R. F.
Wolf, J. A. *The affine group of a Lie group*, 352.
Wolfowitz, J. *Products of indecomposable, aperiodic, stochastic matrices*, 733.
Wolfson, K. G. *Isomorphisms of the endomorphism rings of a class of torsion-free modules*, 589.
Wonenburger, M. J. *Matrix $*$-rings*, 211.
Yood, Bertram. *On the extension of modular maximal ideals*, 615.
Zierler, Neal. *Order properties of bounded observables*, 346.
Zuckerman, H. S. See Hewitt, Edwin.
